Assam, India | +91 9101349627 | bhargab1234deka@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

B.Tech Computer Science graduate (2026) with hands-on experience building and deploying full stack web applications. Have independently built two live, production-used platforms (a cybersecurity reporting tool and an institutional management portal) and contributed to a team-built real-time interview platform. Comfortable working across React/Next.js frontends, Node.js backends, and SQL/NoSQL databases.

TECHNICAL SKILLS

- Languages: C, C++, Java, JavaScript, TypeScript, Python, SQL
- Frontend: React.js, Next.js, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, PostgreSQL, Supabase
- Tools: Git, GitHub, Docker, Vercel, JWT Authentication

PROJECTS

CyberShield — Cyber Crime Intelligence Platform — *React, Node.js/Express, MongoDB, JWT, Gemini AI* [Live Demo](#)

- Built a platform where users can report cyber crimes and check if a phone number, UPI ID, or website is linked to a known scam.
- Designed a risk-scoring system (0–100) based on report volume, reporter trust, and admin verification, with a trust-point system restricting accounts that file false reports; integrated the Gemini AI API for real-time safety tips.

ORION Hostel Portal — Institutional Management Platform — *Next.js, TypeScript, Supabase (PostgreSQL)* [Live Site](#)

- Independently designed, built, and deployed a website for hostel administration, currently live and used by 75+ residents and an 800+ member alumni network.
- Built an admin dashboard for managing notices, gallery, and alumni approvals with secure role-based login, backed by a Supabase (PostgreSQL) database.

InterviewOS — Real-Time Remote Interview Platform (Major Project) — *Next.js, Node.js/Go, WebRTC, PostgreSQL* [GitHub](#)

- Worked in a 4-member team to build a platform for conducting technical interviews online with live video and a shared code editor; personally built the Next.js frontend and Electron desktop app, including the video call screen and collaborative code editor.

EXPERIENCE

Software Development Intern — Assam Power Distribution Company Ltd. (APDCL) *Jul – Aug 2025*

- Built a full-stack (MERN) platform managing the complete electricity connection lifecycle across 4 user roles (Customer, Field Engineer, Admin, Super Admin), from application to meter installation.
- Designed a 14-stage status tracking pipeline with a real-time customer dashboard, KYC document verification (Aadhaar/PAN), and a helpdesk ticketing system with admin replies and feedback ratings.
- Implemented secure JWT authentication with role-based access control, plus an energy usage tracker with interactive charts and PDF bill export.

Research Intern — Indian Institute of Technology (IIT) Guwahati *Jul – Aug 2024*

- Studied and analyzed the Base-Delta-Immediate (BDI) cache compression technique (Pekhimenko et al., PACT 2012) used to improve on-chip cache capacity and memory system performance.
- Performed memory trace analysis to evaluate compression ratios and the potential performance improvement from applying BDI-style compression to cache data.

AI Program (Agentic AI) — IBM SkillsBuild, in collaboration with CSRBOX *Jul – Aug 2025*

- Completed a 4-week project-based training program, "Agentic AI: From Learner to Builder," building simple AI agent-based solutions using prompt engineering.

EDUCATION

B.Tech, Computer Science & Engineering — Jorhat Engineering College *2022 – 2026 | CGPA: 6.75/10*

Higher Secondary (Science) — Assam Higher Secondary Education Council *2022 | First Division, 408/500*

HSLC (Class X) — Board of Secondary Education, Assam *2020 | First Division, 540/600*

CERTIFICATIONS

- IBM SkillsBuild & CSRBOX — Agentic AI: AI Agent Architect, 2025 | Infosys Springboard — SQL, Cyber Security
